

AIR WIPES

Republic manufactures the most innovative air wipe system on the market today. For wire, cable and extruded materials from .010" to 2" diameter and up to 1,500 ft. / min, our single system is the most efficient available. Multiple systems can be incorporated for higher speeds. Our open jaw design eliminates the need for threading during a break or spool change, decreasing downtime and increasing throughput.

OVERSPRAY ENCLOSURE

Republic's stainless steel overspray enclosures are designed to adjust to any conveyor cross section. Using the adjustable legs and a variety of width options, with or without a custom fit drain pan, these units include see-through doors that lift using hydraulic hinges for quick and easy line access.

ALL-IN-ONE ENCLOSURE

Our stainless steel All-In-One Enclosure is designed to contain overspray, debris and noise generated by an air knife system. It includes the overspray enclosure, drain pan, blower, motor, all piping, and air knives, along with Republic's lateral slide system for quick change-over - all in a free standing configuration.
